

# GEROtool® Reel traverse

Robust tool for safe loading and unloading of pipe reels

The GEROtool® reel lifting traverse makes it easy to attach and handle large and heavy coil reels with PE pipe.

## The tool

## In action

## Special features

This lifting aid is an assistance for construction site unloading processes of large reels. The reel-specific crossbeam design enables stable and load-distributing reel suspension as well as safe lifting and horizontal movements.

## Functionality / Operation

- GEROtool® traverse for lifting of a large reel
- Insert the angle profiles into the hollow cylinder of the reel axle on both sides
- Guide the round slings on both sides through the shackle eyes on the angle profiles and vertically to the underside of the traverse and fasten them to the ends of the traverse
- Using two further round slings, guided diagonally to the hook receptacle of the hoist, the traverse sling is suspended in the centre, thus distributing the load
- Safe reel transport is ensured when the reel is lifted vertically in a professional manner

## Design and form of delivery

- GEROtool® reel traverse for TVG large-diameter pipe reel type A with a maximum load of 5,000 kg
- GEROtool® reel traverse for roller carriers (40 kg) with two shackle eyes on both sides
- Two angle profiles with shackles for reel axle suspension (2 x 10 kg)
- Two pairs of lifting slings (round slings) for reel and load hook suspension

## General notes

- When selecting the lifting vehicle, the maximum permissible total weight and the required minimum lifting height must be taken into account (height of traverse suspension, reel and lifting height).
- The GEROtool® traverse is only authorised for hanging and transporting large spoked reels (TVG large-diameter pipe reel type A with a maximum load of 5,000 kg).
- The manufacturer's guidelines as well as all legal and standardised regulations, instructions and laws for the professional slinging, lifting, transporting and setting down of loads must be observed.

## Product range

Product-Nr.	Description
35121	GEROtool® reel traverse, two angle profiles with shackle for reel axle suspension, two pairs of lifting slings for reel and load hook suspension
